

PROCEDURE: 2017

SOFTWARE SUPPORT

DATE: 06/26/80

TITLE: Load Library Use

Purpose

To implement procedures concerning the creation, use, and maintenance of load libraries.

Definitions

Production: Those programs which have been tested and are deemed suitable for repetitive execution in a productive environment.

Test: Those programs which are currently being tested for the removal of errors prior to becoming production programs.

Production Library: SYS1.LOADLIB is to be a production library containing production programs only.

Staging Library: SYS4.STAGING is the staging library where production programs to be copied to SYS1.LOADLIB reside.

Test Library: SYS5.TESTLIB is a test library containing test programs only.

Moving From Test Library to Production Library

Software Support will copy programs from staging library to SYS1.LOADLIB.

User Libraries

User load libraries are not allowed.

Space Allocation for Libraries

Space allocation for libraries will be done by Software Support, as well as compression and daily backups.

Effective Date

| _____ |

The effective date for this change will be September 1, 1980.
